

Hambi mesh bender MBH 401 V

520.20240

Machine specifically suited for bending steel mesh, concrete mesh. The hydraulic MBH version has the advantage that very compact dimensions for cages bent from mesh can be achieved.

Features:

- Reinforced construction and bending cams.
- Hydraulic drive system.
- 2 bending speeds.
- Easy and quick adjustment of the bending cam positions.
- Setting up 3 bending angles up to 180°.
- Equipped with anti-rotation feature and central locking.
- With bending roll rail, preventing damages to the welded wire mesh.
- Larger bending cams (45, 60 and 75mm) are available on request.

Technical information:

- Bending capacity with 30mm bending cams: max. 40 x Ø12 mm, max. 25 x Ø14 mm
- Working width: 4 meter
- Voltage: 400V / 50Hz
- Power: 7,5 kW
- Dimensions (mm): 4400x750x950
- Weight: 900 kg
