

## **Stirrup bending machine D24L max. Ø20**

515.10004

The electrically powered D24L bending machine is specially designed for bending stirrups.

Angle adjustment by programmable controller, easily adjustable up to 10 different bending angles.

The machine is equipped with 2 bar guides and measuring stops for accurate and fast bending of larger numbers.

The bending angle can be changed with a switch and is variable between 0 and 257 degrees.

Delivered with:

- 2x bending pin 20
- 1x bending roller 30
- 1x bending roller 40
- 1x bending roller 60
- 1x bending roller 80
